

FOR IMMEDIATE RELEASE

SUNRISE SECURES LONG-TERM SUPPLY CONTRACT FROM SINO-AMERICAN SILICON PRODUCTS, INC.

(Yilan, Taiwan, October 29, 2008) — Sunrise Global Solar Company (Sunrise), a Taiwan-based manufacturer of high-efficiency monocrystalline solar cells, announced that it has signed a long-term silicon wafer supply agreement with Sino-American Silicon Products, Inc. (SAS), a leading supplier of high purity ingots and wafers to the solar energy and semiconductor industries.

Under the terms of the contract, Sunrise has agreed to buy approximately \$150 million dollars of silicon wafers from SAS starting in January 2009. This contract, which continues through 2017, builds on the existing strategic relationship between the two firms, SAS being one of Sunrise's founding investors.

"We are pleased to have finalized this wafer supply contract with SAS, a company that Sunrise views as an important strategic long-term partner," said Hsu Kuei-Chang, CEO of Sunrise. "The experience of the SAS team and the high-quality of the SAS wafers allows Sunrise to continue developing industry-leading solar cells in terms of conversion-efficiency and consistency."

Doris Hsu, President of SAS, said: "We are looking forward to building upon our strong partnership with Sunrise and in the process create a cleaner environment for future generations. We share Sunrise's vision to expand the scope of the solar industry by delivering cost-effective and high-efficiency solar cells."

ABOUT SUNRISE GLOBAL SOLAR

Sunrise designs, manufactures and markets high-performance solar cells worldwide for residential, commercial and utility-scale power plant customers. Sunrise high-efficiency solar cells generate significantly more power than conventional solar technologies. With headquarters in Yilan, Taiwan, Sunrise marries cutting edge technology with highly competitive manufacturing to produce a clean and reliable energy solution that achieves stand-alone competitiveness with deregulated electricity markets. ABOUT SINO-AMERICAN SILICON PRODUCTS, INC.

Sino-American Silicon Products Inc., incorporated in Taiwan in 1981, is principally engaged in the research, development, manufacture and sale of silicon wafers and ingots. The Company offers silicon products, including non-polished wafers, polished wafers, heavily-doped substrates and diffused wafers; solar products, including mono crystalline wafers and multi crystalline wafers, as well as oxide single crystal products, including sapphire wafers.. The Company distributes its products in the domestic market and to overseas markets, including the rest of Asia, the Americas, Europe and Australia.
